## Laparoscopic System

---

### GelSeal® Technology

Enables multiple hand and instrument exchanges while maintaining pneumoperitoneum.

Accommodates trocar insertion for versatility and patient cosmesis.

Features a small profile for limited abdominal space.

### Enabling Design

Offers great access for rapid dissection and mobilization of tissue.

Facilitates a Pfannensteil approach to optimize advanced procedures.

Facilitates simple and rapid setup.

### Alexis® Wound Protector-Retractor

Adjusts to retract varying abdominal walls and different incision sizes.

Offers 360° of atraumatic retraction and protection<sup>1-2</sup> for great exposure and access.

Simplifies extracorporeal resection and specimen retrieval.

Allows clear visualization of wound margins.

1. Reid K., et al. Barrier Wound Protection Decreases Surgical Site Infection in Open Elective Colorectal Surgery: A Randomized Clinical Trial. *Dis Colon Rectum*. 2010 Oct; 53(10): 1374-1380.

2. Horiuchi T., et al. Randomized Controlled Investigation of the Anti-Infective Properties of the Alexis Retractor/Protector of Incision Sites. *J Trauma*. 2007 Jan; 62(1): 212-215.

### **Union of Technologies**

Allows ample access for surgical speed and efficiency.

Simplifies specimen retrieval.

Provides 360° of atraumatic retraction and protection.<sup>1-2</sup>

Offers trocar access for versatility.
